

TRUONG NGUYEN ANH KIET

FRONT-END DEVELOPER

Thu Duc, Ho Chi Minh City | 0938395724 | kiettna.dev@gmail.com

CAREER OBJECTIVE

I'm seeking a long-term Frontend Developer position where I can contribute to building high-performance web applications with smooth and intuitive user experiences. With strong expertise in ReactJS, Next.js, and TypeScript, I focus on clean software architecture, performance optimization, and refined UI/UX design to deliver real business value and exceptional experiences for users.

TECHNICAL SKILL

- Programming Languages:** JavaScript, TypeScript, HTML, CSS.
- Frameworks & Libraries:** ReactJS, NextJS, Redux, TailwindCSS, Ant Design, Shadcn/ui.
- Responsive Design:** Proficient in creating responsive interfaces using Flexbox and CSS Grid, experienced in adapting layouts for various screen sizes.
- Web Servers:** Nginx, Ubuntu.

EDUCATION

Information Technology

Ho Chi Minh City College Technology

Degree classification: Very Good

WORK EXPERIENCE

Fullstack Developer

June 2024 - Present

Freelance

- Developed responsive interfaces with ReactJS, TailwindCSS, Ant Design, and managed state with Redux.
- Developed RESTful APIs using NestJS and .NET Core, implementing secure authentication and efficient data handling.

Frontend Developer

April 2023 - June 2024

Emage Development Company Limited

- Developed and maintained website user interfaces with ReactJS, ensuring seamless user experience and responsiveness.
- Customized and integrated Ant Design UI components to meet project requirements flexibly and efficiently.
- Utilized Redux for state management, reducing page reloads and improving performance.
- Implemented Socket.IO for real-time server-browser connections, enabling rapid state updates.

Fullstack Developer

November 2022 - February 2023

Vietinfo Technology Corporation

- Developed backend APIs with .NET Core 6, Entity Framework, and LINQ for efficient data processing.
- Built and integrated frontend features using HTML/CSS, JavaScript, jQuery, and DevExtreme.
- Researched and executed a Blazor (WebAssembly) demo project to explore potential future applications.

PROJECTS

AeonLab

Image & Video Annotation System

- Description: A web-based platform for managing and annotating image/video datasets to support AI model training. Built with ReactJS, Ant Design, Redux, and SCSS, the system enables users to create and edit annotation tasks with real-time updates via Socket.IO, delivering a modern UI and high-performance user experience.
- Tech stack: ReactJS, Ant Design, Redux, SCSS, Socket.IO
- Role: Frontend Developer – implemented UI architecture, optimized rendering performance, and integrated real-time annotation updates.

HRM

Human Resource Management

- Description: A web-based HR management platform that handles employee profiles, attendance tracking, payroll processing, and user permissions. Built with ReactJS, Ant Design, Redux, and SCSS, it delivers a smooth and responsive UI with real-time updates powered by Socket.IO. Designed to enhance efficiency, user experience, and data visibility for HR operations.
- Tech stack: ReactJS, Ant Design, Redux, SCSS, Socket.IO
- Role: Frontend Developer – developed and optimized the user interface, implemented real-time features, and improved workflow efficiency.
